

[AEONCOM INTERNAL MEMORANDUM]

Date: 14 March 2024

Ref: Subject-27 / RED Echo Branch

Security Level: E7 / Locked Memo Stream

Technician Ferran Yudha confirmed Subject-27 began transmitting after exposure to harmonic signal sample F24-ECHO-433.

This transmission does not match any known terrestrial waveform and is considered active-anomalous.

The phrase "they are not shadows, they are watching from below" was repeatedly detected in whispered form, both in the analog wave and in Subject-27's vocal repetition.

Request to terminate signal loop denied by Oversight-2.

All attempts to sever link resulted in immediate waveform distortion and memory drift in surrounding personnel.

Conclusion:

Subject-27 has entered Phase BLACK. Access is now restricted to lead AI node through NLK-E7 only.
