

[INTERNAL PATIENT REPORT - AEONCOM PSYCH DIVISION]

Patient ID: #001

Date of Evaluation: 12 March 2024

Ref: Proyek-F24 / Phase Observation Unit

Subject: Sela Angela Yudha

Relation: Biological sibling of Technician Ferran Yudha

Symptoms Observed:

- Auditory hallucinations when exposed to specific frequency bands
- Persistent visual artifacts in low-light environments
- Repetitive ideation regarding circular waveform patterns

Additional Notes:

Subject has displayed an intense fixation with the concept of "locking" unwanted memories.

Multiple references to a repeated pattern of characters: lock_c82 - potentially mnemonic?

Cross-reference with incident logs from RED-27 timeline for validation.

EEG scan recorded abnormal neural spikes around 433.02Hz, aligning with reported anomalies from the F24 signal relay project.

Recommended Action:

- Continued monitoring under sensory-isolated conditions
- Lock relevant entries in the RED archive for internal access only
